

Chain Sliders

Models GDS 630 CH, GDS 630 CH HD

GDS - Your Automatic Choice

GENERAL INFORMATION

GDS 630 CH HD (HEAVY DUTY) HEAVY DUTY CHAIN SLIDER WITH IDLER SHAFT

- 1.5Kw inverter with CB6 controls
- 1.1Kw Drive motor
- Cast iron gearbox with idler shaft
- Includes chain mounting bracket & holders
- Variable speed - up to 630mm per sec on opening
- Normally 300mm/sec on closing
- Latest technology in industrial gate controls
- Reduced installation time

GDS 630 CH CHAIN SLIDER WITH IDLER SHAFT

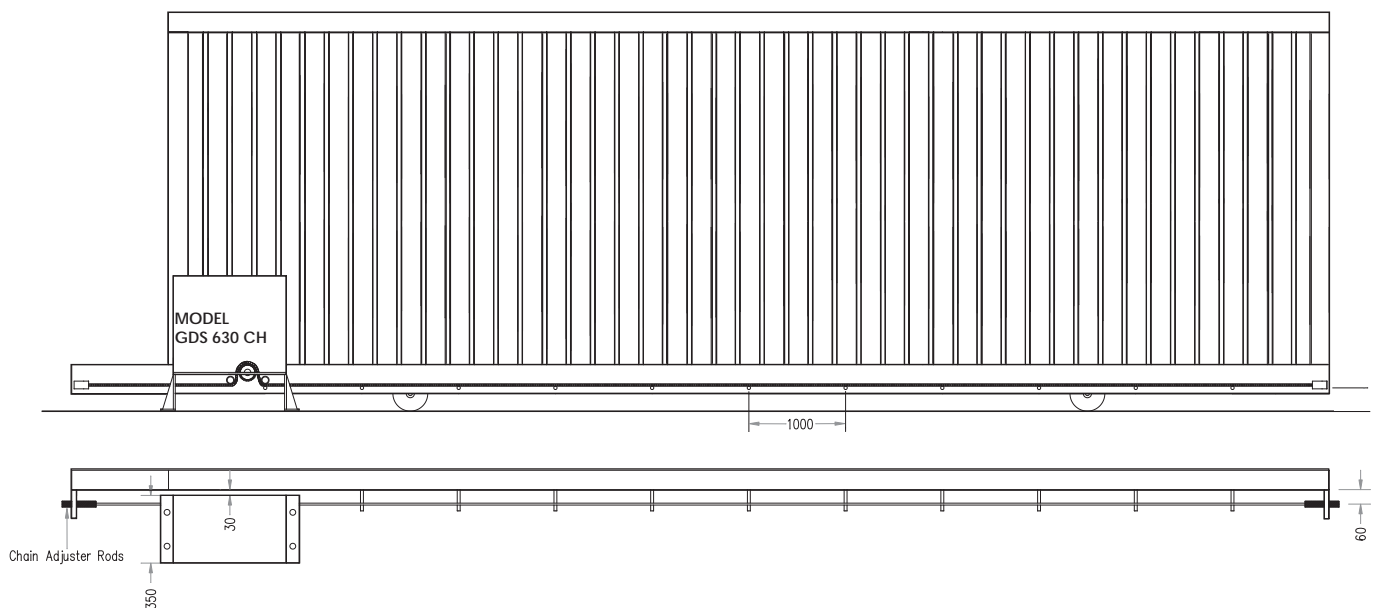

- .75Kw inverter with CB6 controls
- .75Kw Drive motor
- Cast iron gearbox with idler shaft
- Includes chain mounting bracket & holders
- Variable speed - up to 630mm per sec on opening
- Normally 300mm/sec on closing
- Latest technology in industrial gate controls
- Reduced installation time

TECHNICAL DETAILS

For heavy large gates up to approx 2 tonne
Gates with poor track
Long gates where bending may occur in hot weather

- The unit is easily fixed in position by bolting the mounting plate down with 4 of M12 masonry anchor bolts.
- Chain supports are then fitted every 1000mm along the bottom rail of the gate.
- The provided chain brackets are then bolted to either end of the gate and the chain is fitted to these brackets and under each of the operator's idler sprockets and over the drive sprocket.

SPECIFICATIONS

WIRING DETAILS

240v Non earth leakage protected circuit

NOTE: All automation applications require external photo electric cell protection/induction loop and appropriate warning signs and/or devices.

CHAIN NOT INCLUDED WITH OPERATOR - QUANTITY REQUIRED DEPENDS ON LENGTH OF GATE: PLEASE ORDER SEPARATELY

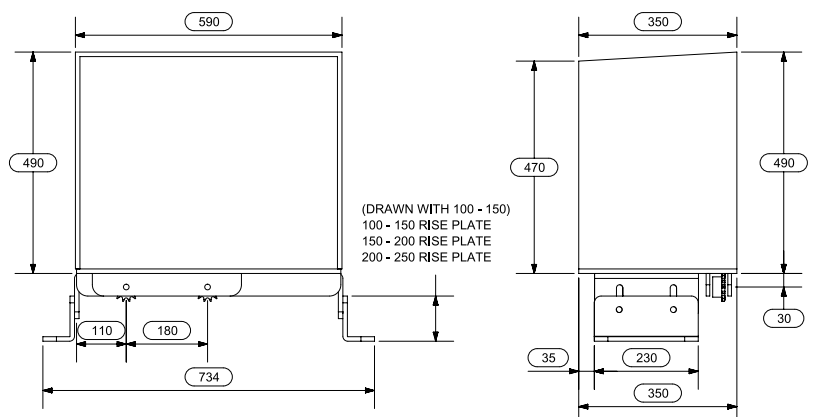

A GDS 315 HD CH is available for gates up to approx 3 tonnes.
